

Session 30 – ICU Obstetrics

26th Novemebr 2010

Friday 2pm AICU SEMINAR ROOM

1. Outline the physiological changes of pregnancy (20mins)
Caroline
2. Write short notes (handout) on the pathophysiology and management of amniotic fluid embolism, ovarian hyperstimulation syndrome and maternal pulmonary thromboembolism – a 3 column table would be ideal (10mins to talk *about* your Handout, not to read every word)
Steve
3. Outline the pathophysiology, complications and management of pre-eclampsia/eclampsia on ICU (30mins)
Alan
4. Outline the pathophysiology and management of post-partum haemorrhage. (20mins)
Vicky
5. Outline your management of the pregnant patient with pre-existing cardiac disease. (20mins)
Matt
